

*Our critical mission is to combine world class scientists, state-of-the-art equipment, and unique facilities to lead the world in providing reliable and definitive forensic identification services.*

The Armed Forces Medical Examiner System (AFMES) is responsible for conducting medical-legal death investigations for the Department of Defense and other federal agencies. Career positions support on-going operations of the AFMES and its divisions, which include:

- Division of Forensic Toxicology
- Department of Defense DNA Registry
  - Armed Forces DNA Identification Laboratory (AFDIL)
  - Armed Forces Repository of Specimen Sample for the Identification of Remains (AFRSSIR)

The ARP Sciences LLC is seeking highly qualified individuals to fill scientific, administrative, logistic, information technology and scientific support positions within the Armed Forces Medical Examiner System. These positions cover a wide range of educational and work experience qualifications. Candidates must be able to complete a successful background investigation and the ability to obtain a minimum of a Secret Clearance.

***These positions include:***

- DNA Specimen Processor
- Administrative Assistant
- Medical Records Technician
- DNA Technician
- DNA Analyst
- Laboratory Support Personnel
- Analytical Toxicologist
- Logistic Support Personnel
- IM/IT Personnel

Personnel are hired to support the Armed Forces Medical Examiner System operations at Dover Air Force Base, DE. Travel may also be required to support mission operations in the United States or overseas.

These are contract positions with the ARP Sciences LLC. Salaries will be commensurate with experience and education. Comprehensive benefit packages are offered to successful candidates.

*AFMES Laboratory Facility in Dover AFB, Delaware*

Applicants should submit a letter of application, resume, salary history and current salary requirement to:  
ARP Sciences LLC, PO Box 10008, Rockville, MD 20849.

Resumes can be sent by facsimile to (240) 654-0883 or search "ARP" postings on CareerBuilder.com.

The ARP Sciences LLC, working in conjunction with the military and civilian staff of the Armed Forces Medical Examiner System, provides expertise in scientific laboratory operations, research, and field investigations around the world as part of the Department of Defense personnel accounting mission. This world class operation has been recognized for its significant scientific & humanitarian accomplishments.

- Support of medical-legal death investigations of U.S. military personnel around the world.
- Analyze post-mortem autopsy data aiding in the development of new personnel protection systems and military vehicles that will enhance the safety and survivability of our military forces.
- Provide quality assurance oversight of the DoD Drug Testing and Forensic Toxicology programs.
- Research and analyze post-mortem and human performance drug testing for all DoD military aircraft, ship, and ground accidents.
- Coordinate the collection of direct DNA references of all Active Duty, Reserve, and National Guard personnel and authorized civilians supporting the war-fighter.
- Provide evidence response teams and laboratory support for assistance to the National Transportation Safety Board and the HHS-National Disaster Medical System during mass disaster situations.
- Provide DNA laboratory capability to support the identification of missing American personnel from the Vietnam War, Korean War, Cold War, World War II, World I, and the Civil War.
- Use the latest automated DNA forensic capabilities to support DoD programs for the war-fighter.
- Direct applied research of new scientific technologies for use in forensic laboratory operations.
